DeepGuard AI — Forensic Authenticity Certificate

Cryptographically Signed Vision Transformer Multi-Pillar Forensic Verification

OFFICIAL VERDICT: FAKE

CONFIDENCE: 99.3%

Certificate ID: scan-vid-13e07526

Forensic Risk Level: **HIGH**

SHA-256 Fingerprint: 096aba49716e9e116e3af4fb6c9639c8f5e92d851af33506c0e2bb228f406fb6
Digital Signature: RSA-4096 / SHA-256 Tamper-Evident Seal Verified

Inspection & Forensic Pipeline Metadata

Scan ID	scan-vid-13e07526	**Media Type**	VIDEO
Target File	WIN_20240602_15_34_06_Pro.mp4	**Timestamp**	2026-10-21 18:04:46 UTC
Model Engine	dima806/deepfake_vs_real_image_detection	**Provider**	Huggingface
Inference Time	52816 ms	**Frames Analyzed**	60 (33 flagged)
Real Probability	0.67%	**Fake Probability**	99.33%

Six-Pillar Deepfake Forensic Inspection Breakdown

Forensic Pillar	Metric / Parameter	Observed Value	Pillar Verdict
1. Audio & Speech	Lip-Sync & Spectral Cutoff	Flatness: 0.0	NO_AUDIO_TRACK
2. Biological rPPG	Heartbeat Pulse & Blinks	BPM: 110.5 | Blinks: 1	AUTHENTIC_BIOLOGY
3. Error Level (ELA)	Compression Uniformity	84.6% (Var: 0.7x)	Homogeneous
4. Metadata & C2PA	EXIF Hardware & Prompts	Unknown Unknown	STRIPPED_ANONYMOUS_METADATA
5. Visual Attention	ViT Self-Attention Rollout	Boundary: 38/100	FAKE

Forensic Synthesis & Behavioral Observations

Spatiotemporal analysis examined 60 frames across 14.8s. 33 frames (55.0%) exhibited synthetic temporal jitter or boundary warping.

- Analyzed 60 frames across 14.8s timeline
- Peak visual fake probability: 99.9%
- Temporal consistency score: 20%
- Audio Forensics: NO_AUDIO_TRACK (Lip-Sync: 1.0 r)

CERTIFICATE VALIDATION: Scan the QR code above or visit deepguard.ai/verify to validate this digital certificate. DeepGuard AI outputs represent model-inferred statistical confidence and biometric anomalies. Evaluated alongside secondary contextual corroboration and SHA-256 media fingerprint.
